Mengapa Menulis Publikasi Ilmiah?

Penyebab Kegagalan Publikasi Ilmiah di Jurnal Bereputasi

Kurangnya kejelasan *research gap* dan *novelty*

Struktur artikel ilmiah tidak sesuai pedoman jurnal

Kualitas bahasa dan argumentasi lemah

Ketidakjelasan metodologi dan data

Plagiarisme dan etika riset

Not only research articles

Case study

- Describing a current situation or experience
- Should provide a clear context
- Detailed description – consider confidentiality
- Consider how far conclusions can be generalised

Systematic review

- Specific methodology to systematically assess and synthesise previous research
- Review the methods in detail
- Pay particular attention to inclusion/exclusion criteria for the literature search

Review article

- Summary of current state of scholarship
- Look for balance and accuracy

Methodology

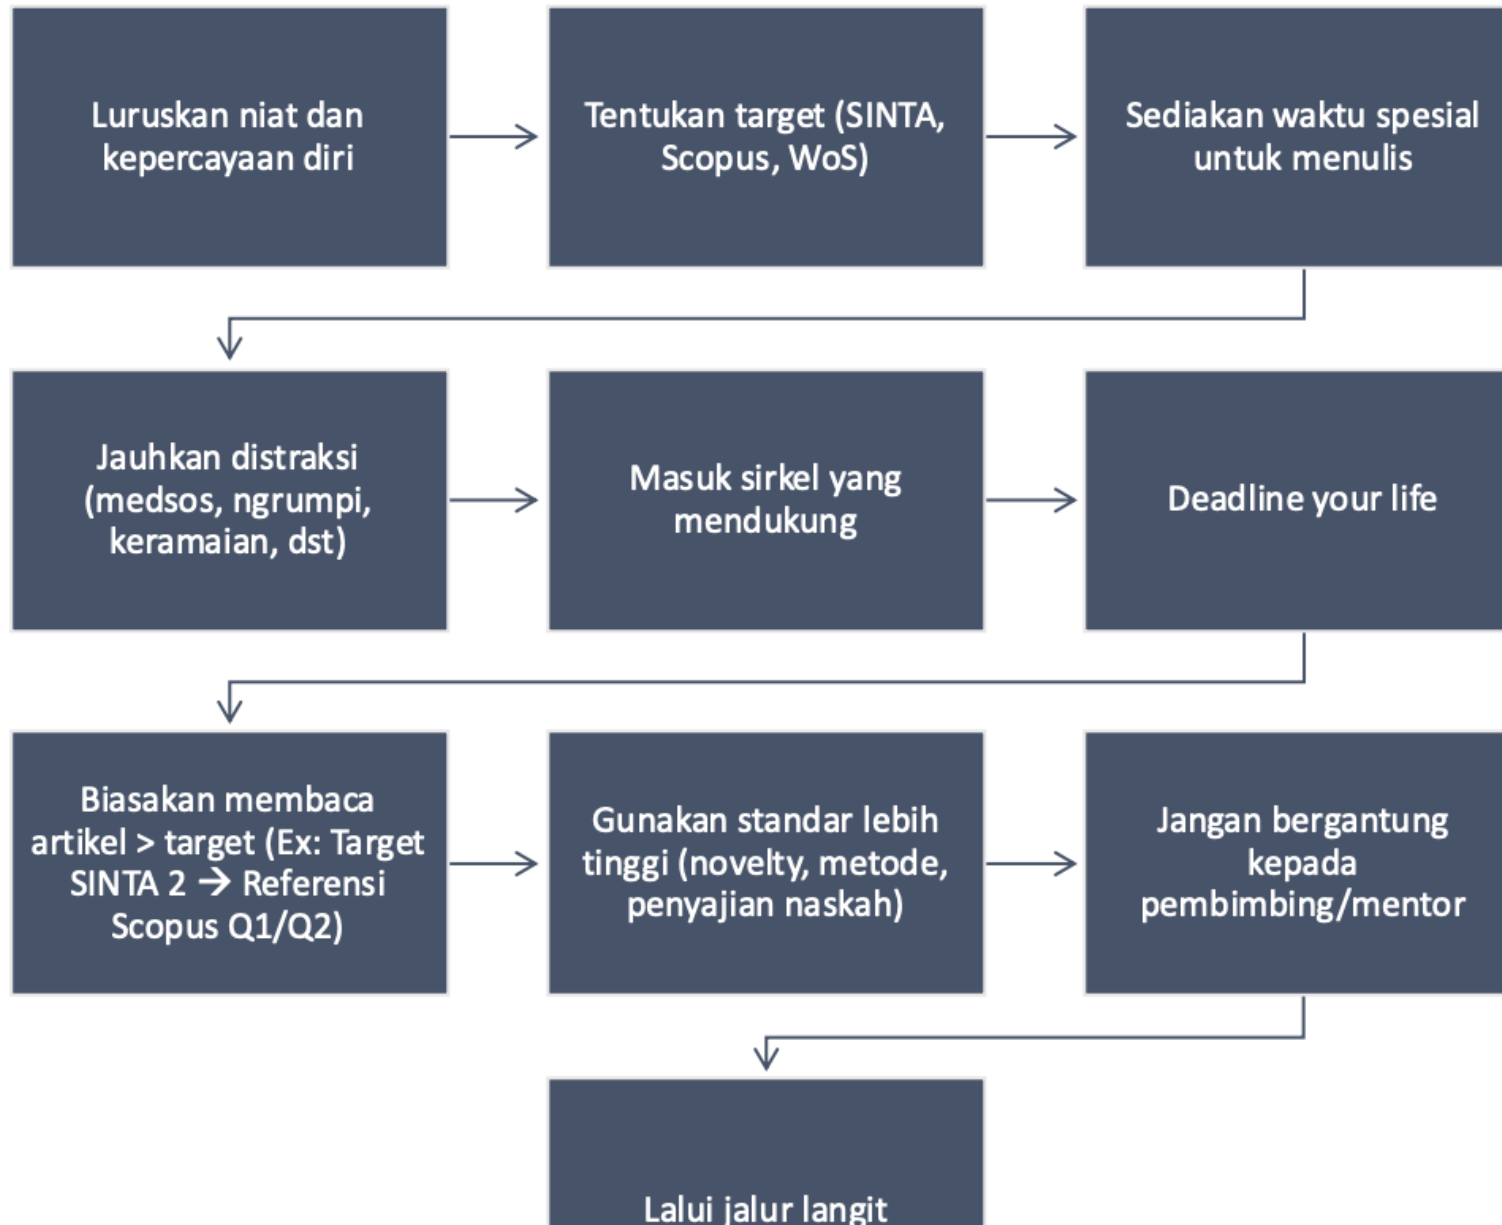

- Detailed description and testing of a novel method
- Should include rationale for the new method and sufficient detail to replicate

Opinion (commentary, editorial)

- Variety of articles where the author gives their views on a topic
- Should be clearly based in the context of current scholarship and contribute to the field
- Look for rigorous argument

Tips Menulis Artikel di Jurnal

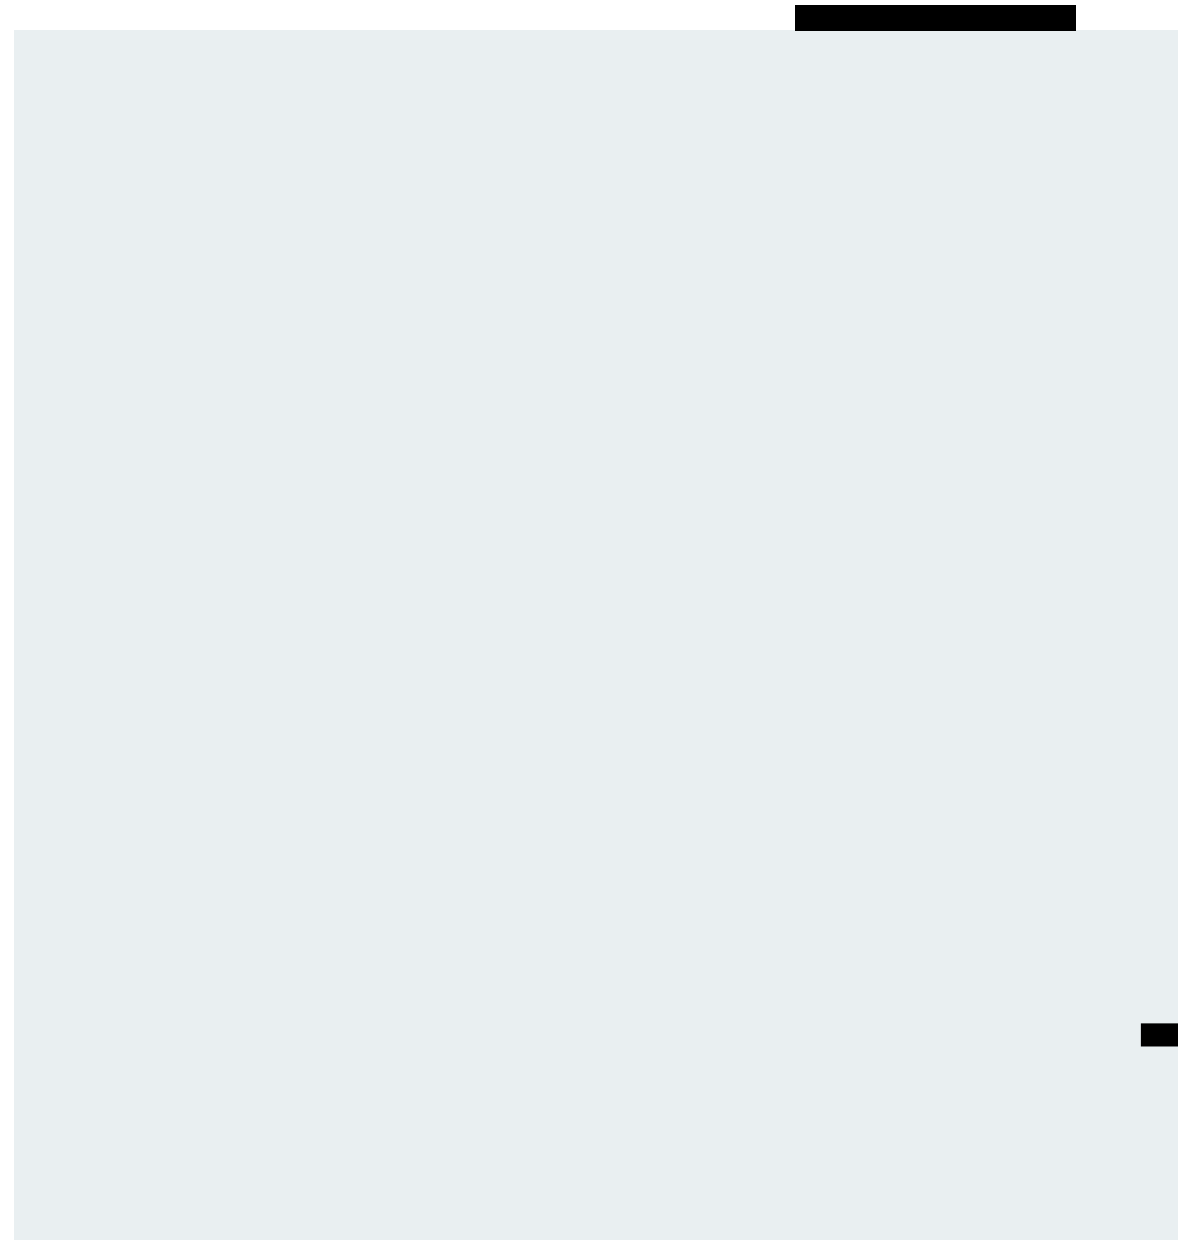

Kendala Bahasa Inggris dalam Penulisan Ilmiah

Many Indonesians struggle with English not because English is hard, but because their Indonesian is weak.

If you can't think clearly in Indonesian, you can't think clearly in English.

Language is not just about speaking—it's about thinking. A student who express an idea clearly in Indonesian will not magically be able to do it in English.

PRACTICE
MAKES
PERFECT
